

Green Roof Planter Mix A

Dry bulk density = 500 kg per m³
Water holding capacity (45%) = 450 kg per m³
Saturated bulk density = 950 kg per m³

Per m² @ 100mm = 95kg
@ 200mm = 190kg
@ 300mm = 285kg

Green Roof Planter Mix B

Dry bulk density = 800 kg per m³
Water holding capacity (40%) = 400 kg per m³
Saturated bulk density = 1200 kg per m³

Per m² @ 100mm = 120kg
@ 200mm = 240kg
@ 300mm = 360kg

Green Roof Planter Mix C

Dry bulk density = 1000 kg per m³
Water holding capacity (35%) = 350 kg per m³
Saturated bulk density = 1350 kg per m³

Per m² @ 100mm = 135kg
@ 200mm = 270kg
@ 300mm = 405kg
