

THE HILLS

BARK BLOWER

Product: The Hills Lightweight Garden Mix

Description: This Lightweight Garden Mix is a nutrient rich organic soil mix. It contains Composted Hardwood Sawdust, Composted Pine Bark Fines, Ash, Soil, and Hills Compost.

Applications: The Hills Lightweight Garden Mix is best used for garden beds and large podium environments. The mix is suitable for natives and exotic shrubs. It is also suitable for annual beds with the addition of slow release fertiliser.

Advantages: This high quality mix provides a substantial medium for plant growth as it is rich in nutrients. The pH is appropriate for most plants including natives, although it can be adjusted upon request. The phosphorous levels are excellent for most natives except for the most sensitive.

Characteristics:	Test Result	Comment
Total WHC	61	acceptable
Toxicity	106.0mm	good
EC	0.80dS/m	acceptable
pH	6.0	acceptable
Potassium	780mg/kg	acceptable
Phosphorous	410mg/kg	acceptable

Other information:

No recommendation here is an assumption. It has been tested* to ensure it will live up to our standards. For more information on the testing procedure and results, please call The Hills Bark Blower on (02) 9654 2288.
