

THE HILLS

BARK BLOWER

Product: The Hills Turf Underlay

Description: This mix is made up of mostly inorganic material providing excellent drainage, aeration and substance under lawns while providing some organics for nutritional purposes. It is composed mainly of Washed River Sand with small amounts of Clinker Ash, Composted Pine Bark Fines, and The Hills Compost.

Applications: The Hills Turf Underlay is suitable to be applied as a growing medium under turf. Its high sand content ensures excellent drainage and aeration to minimize water logging or fungal growth.

Advantages: This high quality mix provides a substantial medium for turf establishment. It is free draining while still retaining a robust structure. The stable organic content provides excellent nutrients for strong initial growth.

| Characteristics: | Test | Result | Comment |
|------------------|----------------|------------|-------------------|
| | pH | 6.7 | acceptable |
| | EC | 0.4 | acceptable |
| | Chloride | 66.2 | acceptable |
| | N-NH4 | 11.3 | little N |
| | NH4 + NO3 | 11.3 | low nitrate |
| | Toxicity index | 102.7 | good result |
| | Phosphorous | 0.3 | low |
| | Potassium | 59.8 | acceptable |
| | Permeability | 248.7mm/hr | acceptable v.high |
